

Specifications

Frame

Our frames have a structural profile that is 50% thicker than our nearest competitor's, and are formed from steel that is 25% thicker (14ga. vs. 16ga.) Unlike our competition, our frame has a recessed edge for Velcro, so it cannot be pulled off if the stage is dragged around on its edge.

Legs

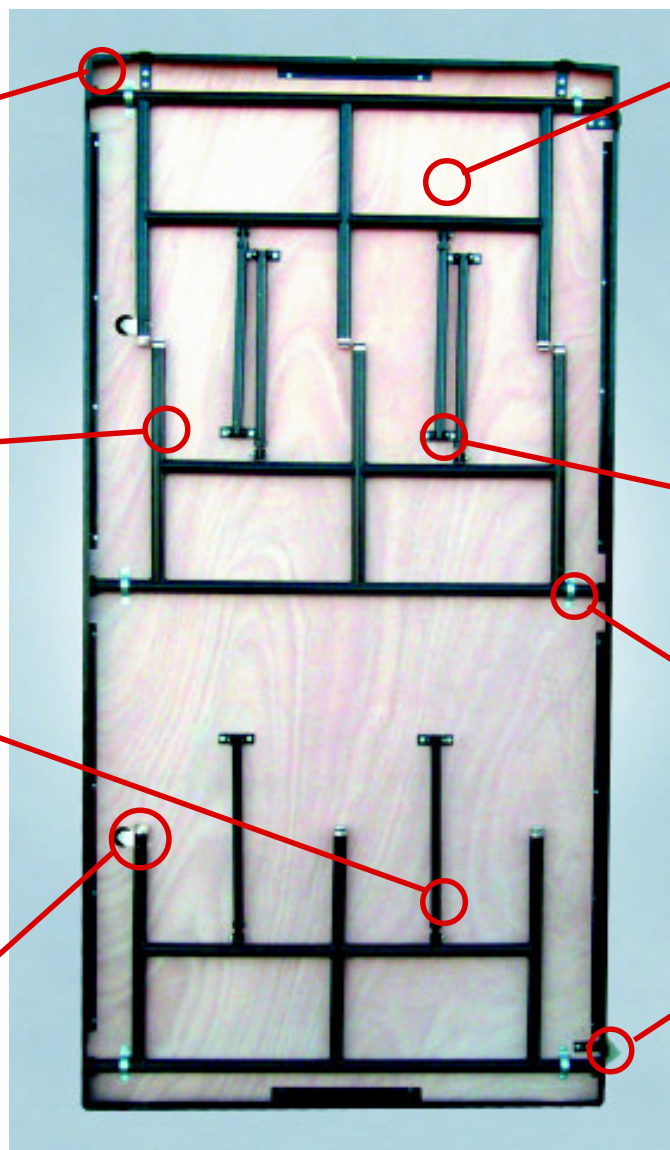

Our stage legs are 30% thicker and stronger than our nearest competitor's. They are attached to both the outer frame and through-bolted to the deck with aircraft style Teflon locking nuts

Truly Automatic Lock

No significant force is needed to operate our lock - it works just like an umbrella handle. Unlike our competition, we use 2 locks (not 1) at every leg to assure that your stage will be safe.

Smart Use of Casters

Unlike expensive mobile stage, our Ultra Portable stage has wheels only where you need them. With this innovation, 1 person can easily set up multiple platforms in no time and without breaking a sweat!

Deck

We do not use particleboard!

We use on the highest-grade 3/4" Luon Mirante plywood on our decks. The competition uses particleboard to mask the quality of their lesser grade plywood. No particleboard means our decks are rated to hold an additional 1600 lbs per section while being 22% lighter*!

Through Bolts

Through bolts are used in all the critical places to provide added security.

Braces

All braces are bolted completely through the deck.

Integral Drop In Couplers

Unlike our competition, Hercul'ite's drop-in couplers are replaceable, and can be easily exchanged if they somehow are broken off.

* A 4' x 8' x 32" poly topped Hercul'ite stage weighs 140 lbs., our competitor's 4' x 8' x 32" poly stage weighs in at 171 lbs.

Hercu'Runner Portable Stages

To start with, the best innovation we can announce with this stage is its incredible price! Please refer to the price list to see why we guarantee that you will not be able to purchase a comparable stage for less. All of our stages are built using the highest quality 3/4" Luon Mirante plywood. This is a more expensive material but creates a lighter, much stronger stage. We also use stainless steel fasteners, through bolting, stronger tubing and a more substantial frame. We use only the best materials to assure that your stage will last. Our stages are modular, allowing not only for an array of possible configurations, but also for easy setup and transportation.

Hercu'Roller Checklist:

- ✓ 15-year warranty*
- ✓ Better construction
- ✓ Lighter weight
- ✓ Stronger
- ✓ Buy Factory Direct

Great Value, Great Variety

Hercu'lite stages are available in a variety of platform sizes, heights and finishes.

Ultimate Portability

Our mechanism allows 1 person to easily maneuver and setup platforms.

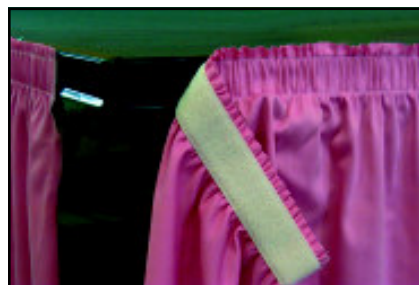

Thicker Legs

Our new stage legs are thicker, stronger and attached to the outer frame and through-bolted to the deck.

Leg Locking Mechanism

Incredibly easy, incredibly durable! Our foolproof leg locking system works like an umbrella handle.

Velcro for Skirting

Our frame has a recessed edge for Velcro, so it will not be pulled off if the stage is dragged around on its edge.

Stage Accessories

Stage steps, back and side rails, skirting, backdrops and carts, we offer all the necessary accessories to perfectly complement your stage.

Heavy Duty Stage Cart

Our heavy duty cart will transport eight stage pieces in a single trip to your storage facility. It features tubing that is over 2.5 times thicker than our competitor's cart and heavy duty locking casters.

Unique Storage

With our touring venue experience, we have developed all sorts of unique storage and transportation options for all of our carts. Please contact a representative for details.

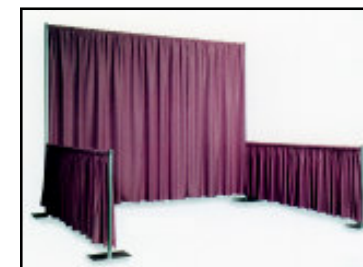

Guard Rails

Guard rails protect the back and sides of the stage as well as both sides of any stairs to be furnished. They quickly attach to stages by clamping on to the frame and bolting through the decking. Unlike our competitor's units, our guard rails require no drilling to install.

Stage Steps

Steps are surfaced with slip resistant polypropylene and clamp securely to any area of the stage perimeter. Guardrails are included for all step units over 8".

Stage Backdrops

Pipe and drape is perfect for stage backdrops. Our backdrops are very easy to assemble, no tools required! They are available in a variety of colors and sizes.

Skirting

Skirting helps you make a difference in the presentation of your stage. Our premium skirting fabrics are flame retardant for your safety. All skirting fabrics are machine washable and dryable. Skirting attaches to stages by Velcro. Available in three different pleat styles.
